

THAPELO MVELY MPETE

IT SOFTWARE DEVELOPMENT GRADUATE | ASPIRING JUNIOR .NET DEVELOPER

072 074 6194 Thapelompete25@outlook.com Rustenburg, North West

GitHub: https://github.com/Thapelo-Mpete-CODES

PROFESSIONAL PROFILE

IT Software Development graduate from Nelson Mandela University with practical experience developing web applications using C#, ASP.NET Core MVC, Entity Framework Core and SQL Server. Built an educational diagnostic platform as a personal project and contributed to a team-based employee management system, gaining hands-on experience in backend development, database integration, CRUD operations and MVC architecture. Interested in building practical software solutions, strengthening technical skills through real-world development experience, and contributing to a collaborative technology team.

TECHNICAL SKILLS

Programming Languages: C#, HTML, CSS, Python for data analysis
Frameworks and Technologies: .NET, ASP.NET Core MVC, Entity Framework Core
Databases: Microsoft SQL Server, database design, data modelling
Development Concepts: Object-oriented programming fundamentals, MVC architecture, CRUD operations, separation of concerns, web application development
Tools and Development Environment: Git, GitHub, Visual Studio, Visual Studio Code

PROJECT EXPERIENCE

GapWise Educational Diagnostic Platform
Technologies: C#, ASP.NET Core MVC, Entity Framework Core, SQL Server

- Developed an educational platform designed to help identify learners' strengths and areas requiring improvement through diagnostic assessments.
- Structured application models for students, tests, questions, answers, grades and concepts to organise assessment data and support performance tracking.
- Implemented backend logic to store assessment results and support the analysis of learner performance at topic and concept level.
- Applied the Model-View-Controller (MVC) architecture to separate application responsibilities and organise the codebase.
- Used Entity Framework Core and SQL Server to support data persistence and the management of application data.

EMPLOYEE MANAGEMENT SYSTEM

Team Project
Technologies: C#, ASP.NET Core MVC, Entity Framework Core, SQL Server

- Contributed to the development of a web application for managing employee records and organisational information.
- Implemented CRUD functionality to create, view and update employee records.
- Worked with models, views and controllers to maintain a structured application design.
- Used Entity Framework Core to connect application functionality with a SQL Server database.
- Gained experience contributing to a shared software project and applying web development concepts to a practical business use case.

DEVELOPER PORTFOLIO WEBSITE

P**ersonal Project**
Technologies: HTML, CSS, GitHub Pages

- Designed and published a personal portfolio website to showcase software projects, technical skills and professional contact information.
- Organised project descriptions and repository links to make technical work accessible to recruiters and other visitors.
- Published the website using GitHub Pages, providing a publicly accessible record of development work.

Live Portfolio: https://thapelo-mpete-codes.github.io/Thapelo_Mpete_Codes_Portfolio/

EDUCATION

Diploma in Information Technology: (Software Development) Nelson Mandela University
Completed: December 2025

Relevant study areas: Software development, web development, database concepts, systems analysis, programming with C# and .NET.

CORE STRENGTHS

- Problem-solving and logical thinking
- Attention to detail
- Independent learning and continuous improvement
- Teamwork and collaboration
- Communication
- Adaptability and willingness to learn new technologies
